

Watt Watchers of Texas - *Saving Energy in Texas Schools...*

Monthly Email Update August 2005 ~a supplement of the Watts News Quarterly Newspaper

Welcome back to school!

Start the year off right with Watt Watchers. Get your Watt Watchers patrols going now and get your school in the habit of saving energy, saving money and preventing pollution. If you need any supplies for your Watt Watchers kit contact us at info@wattwatchers.org . Have a great year!

Watt Watchers of Texas is celebrating its 20th anniversary – send us your WW pictures!

Watt Watchers of Texas is kicking off the celebration of our 20th Anniversary. Can you believe it – 20 years! Well it's true. Watt Watchers of Texas began as a pilot program at the Region 4 Education Service Center in 1985 and it continues to grow stronger everyday. We will be spotlighting programs throughout our anniversary year and we would like your help. Send us information about when you started your program and where it is today along with pictures of your patrols. The unique thing about the Watt Watchers of Texas program is that every school in the state participates in a different way but the goal for all is to educate the future about smart energy use and save energy in Texas Schools!

Knowledge is Power is in the mail!

Keep an eye on the mailbox because Watt Watchers of Texas has just mailed out the new Knowledge is Power Curriculum Supplement Booklet. This 76 page booklet is full of great lesson plans that you will want to incorporate to your energy unit. The lesson plans are teacher friendly and student friendly – try them out and let us know what you think!
